Projects

Recommending System for Book store Using Cloud computing
A recommendation system filters information by predicting ratings or preferences of customers for items that the customers would like to use. It tries to recommend items to the customers according to their needs and taste.

-

Insurance_Claiming_Prediction Using Machine Leraning
An insurance claim is a formal request from the policyholder (that's you) to their insurance company asking for payment after a covered incident. These incidents can include anything covered by your insurance policy, like a hospital stay, a natural disaster, or theft.
